

SPLASH SHAMPOO

Article code: 12121

**INGENIOUS
CAR CARE**

Products for professionals

Description:

Splash Shampoo is a foaming, cleansing car shampoo that leaves a deep shine and water repellent result.

Benefits:

- Active foaming cleaning
- Deep gloss and protection
- Built in rinse aid producing a very strong water beading effect
- Chamois hardly necessary when rinsed off correctly
- Pleasant fragrance

Application:

Ideal product for manually cleaning cars, vans, trucks and caravans.

Directions for use:

Remove sand from the vehicle by rinsing it off with water and a pressure washer. In case of very heavy soiling, a pre-cleaner can be used first. Then mix the Splash Shampoo 1:80 with clean water in a bucket. Use a dirt sieve in the bucket if possible. Wash the vehicle from top to bottom with a wash mitt. Rinse off with water afterwards immediately. When using a full jet of water from a hose or nozzle, the rinse works optimally and most water/shampoo residues will be rinsed off automatically. Avoid Splash Shampoo from drying out and preferably do not wash in direct sunlight. Always dry the car thoroughly with a chamois or drying towel.

Tips & tricks:

- Preferably use a grit guard in the bucket while washing the car to avoid scratches.
- With the right ratio and equipment such as a water hose or nozzle, thanks to an even rinse of the water the use of a chamois can be kept to a minimum.
- Preferably rinse the car with de-ionised water to prevent limescale stains.
