## Description:

Engine Wash is a solvent-free cleaner developed for quickly and effortlessly removing built up oil, grease and grime from engine bays.

## Benefits:

- Solvent-free
- More environmentally friendly than products with solvents
- Viscous product, allowing for longer soaking time.
- Dissolves grease, oil and road grime effortlessly.

## Application:

Contamination on engines and parts such as oil, grease and road grime are easily cleaned by Engine Wash. Can also be used for cleaning doorposts, exhausts and behind the fuel filler cap.

## Directions for use:

Spray Engine Wash anywhere in the engine bay where you want to remove built up oils, grease, dirt and grime. Leave on for 3 to 5 minutes. In case of built up soiling, use a brush to agitate. Then spray the engine compartment clean with sufficient water. Preferably use a pressure washer. DO NOT use on hot engines, allow engine to cool after driving before cleaning.

## Tips & Tricks:

For door pillars leave the product on for 1-5 minutes and spray clean with a pressure washer. Be sure to aim the pressure washer from the inside to the outside so the interior does not get wet.
