

TAR REMOVER

Article code: ESL06-05

1-3 min.

**INGENIOUS
CAR CARE**

Products for professionals

Description:

Tar Remover quickly removes asphalt, tar and glue residues.

Benefits:

- Dissolves tar quickly and Effectively
- Use during pre-cleaning
- Ideal product for dry finishing

Application:

Tar Remover easily dissolves tar, bitumen and asphalt. Can be used dry and wet. When wet, apply the product before the pre-cleaner. Contains emulsifiers so that the product can be rinsed off with high pressure after use. When dry, use a cloth to make circular movements until all tar is removed.

Directions for use:

Spray Tar Remover on to the surface to be cleaned. Leave on for 1 to 2 minutes and then remove with a clean microfibre cloth or water. Do not leave used cloths resting on painted surfaces. In case of freshly sprayed or very old/damaged painted surfaces, test on an inconspicuous area to prevent possible damage.

Tips & Tricks:

Be sure that there is no film of water on the paintwork before applying the Tar Remover. This impedes the operation of the product. Tar Remover works well in addition to tar to remove sticker residue.
