Products for professionals

Description:

Pre Wash is a ready-to-use product with a strong cleaning effect. This product quickly and thoroughly removes traffic dirt and other contaminants from cars, trucks and other vehicles or surfaces. Thanks to it being a mild alkaline product, it is generally safe to use.

Benefits:

- Effective cleaner
- Safe to use on aluminium and chrome
- Streak-free result
- High stable foam
- Pleasant scent

Application:

Pre Wash is used for heavy soiling on vehicles. It is an ideal product to remove traffic dirt, insects and greasy deposits. Due to its special formulation, aluminium and chrome are not affected. This makes it very suitable as a pre-wash on cars where these materials are very common.

Directions for use:

Spray Pre Wash (with supplied sprayer) undiluted on the surface to be cleaned. Allow the product to soak in for 1 to 2 minutes. Rinse with clean water, preferably with pressure washer to remove traffic dirt. Pre Wash is generally safe to use. Always check the product in an inconspicuous place before using to avoid possible damage.

Tips & Tricks:

Do not use Pre Wash in direct sunlight and do not let it dry on the surface. Do not use Pre Wash on anodised aluminium as it may cause damage, for example, on specially treated rims.
