INGENIOUS CAR CARE

Products for professionals

Description:

Wet Coat is a hydrophobic spray coating that can be easily applied after washing the car. The product gives the car paint a very deep gloss and provides extreme water beading.

Benefits:

- Quick to apply. Spray on/rinse off.
- Fast conversion from sheeting to beading by rinsing with water.
- Very good and long-lasting protection.
- Droplets have extremely high contact angle.
- Very high gloss result.
- Highly resistant to acid and alkaline chemicals.
- Works well on paintwork, vinyl, ppf film and rims.
- Self-cleaning effect due to “hydrophobic roller booster” properties.

Application:

Wet Coat is a spray on / rinse off coating that adheres strongly to the surface while providing very good protection, high gloss and water repellent.

Directions for use:

Clean the car with a pre-cleaner and then rinse the car well with a high-pressure cleaner. Then wash the whole car with Cartec Essentials Neutral Wash Shampoo or one of the other Cartec shampoos. Rinse the shampoo well with clean water. Then spray the Wet Coat evenly on the wet car. Immediately after the Wet Coat has been applied, rinse the whole car with a high pressure cleaner or a strong water jet. The car will be extremely beaded and is now protected. Use a chamois to remove any remaining water drops.

Tips & Tricks:

Wet Coat must not be allowed to dry after application. Never use Wet Coat in full sun or in a warm environment. If necessary apply Wet Coat section by section in warm conditions. Always rinse off the Wet Coat immediately after application to avoid staining.
