

# VINYL

Pure 1 min. Up to 3 months

This product is part of **COLORLINE**

## INGENIOUS CAR CARE

Products for professionals

### Description:

Cartec Vinyl was developed as a 'finishing touch' when treating vehicle plastic parts, bumpers and tyres. Its special formula gives these materials a silk-matt and original appearance. It also protects against weather influences. Vinyl is available in both Silicone-based and Silicone-free versions.

### Product benefits:

- ✓ Immediately visible result
- ✓ Returns plastic original look
- ✓ Dries evenly and is non-greasy
- ✓ Leaves tyres looking like new
- ✓ Great protection
- ✓ Satin finish

### Application:

Cartec Vinyl restores a new and original look to plastic parts, bumpers and tyres. It also gives good protection.

### Instructions for use:

⚠ Always check the product in an inconspicuous place before use to prevent possible damage. Provide a well-ventilated area. Shake well before use.

1. Apply the product using the vinyl sponge (3211/1) to areas to be treated such as plastic strips, bumpers and tyres.
2. Let it penetrate in for a while and then rub with the back of the sponge.
3. (Optional) On very absorbent surfaces, the treatment can be repeated for an even deeper and shinier result.

### Tips & Tricks:

- ✓ Clean the tyres beforehand with Cartec Wheel Cleaner (12201) in combination with the Cartec Dynamic Tyre Brush (3038/02).
- ✓ On small areas, work with the tip of the sponge, or cut a sponge in half.
- ✓ On tyres, it can also be sprayed with a sprayer or pressure pump.
- ✓ Cartec Vinyl can be used to maintain door rubbers. Especially in winter against freezing.
