Products for professionals

Description:

Textile Cleaner is a highly concentrated cleaning product for textiles. It removes oil, grease, nicotine deposits and other strong dirt from e.g. car seat upholstery, car mats and carpets. Thanks to a special polymer, Textile Cleaner leaves a fibre-strengthening protective layer behind. This makes the cleaned surface look like new again and stays clean longer.

Product benefits:

- ✓ Pleasant scent
- ✓ Good for upholstery, cleans well and smells nice and fresh, prevents musty odour
- ✓ Does not leave a white residue after cleaning
- ✓ Gives the fibres a protective layer
- ✓ Surface like new again for a long time

Application:

Cartec Textile Cleaner is used on heavily soiled seat covers, car mats and carpets to easily remove dirt, oil, grease and nicotine deposits.

Instructions for use:

⚠ Always check the product in an inconspicuous place before use to avoid possible damage. Do not use on plastic parts.

1. Dilute 1:5 to 1:10 with water according to the degree of soiling. Apply with a pressure pump or atomiser to the parts to be cleaned.
2. Soak for 1 to 3 minutes and massage in with the Cartec Soft Interior Brush (3038/01) or the Cartec microfibre glove (3043/8).
3.
 - a. If using a microfibre cloth (such as 3317/51), wet the cloth thoroughly and wipe the surface until the soap residue has disappeared. Then rub again with a dry, clean cloth.
 - b. When using an extraction machine (only for on upholstery): Rinse with clean water and vacuum so that the soiling is completely removed.
4. Let the surface dry.

Tips & Tricks:

- ✓ Car mats are easily cleaned with a Cartec Cleaning Gun (3119/01) filled with Cartec Textile Cleaner.
- ✓ For hard-to-reach areas, use the Cartec detailing brush (3039/10).
