Products for professionals

Description:

Wash & Wax Shampoo is a good cleansing car shampoo with wax. Gives a deep glossy, water-repellent result.

Benefits:

- Active foaming cleaning
- Deep gloss and protection through wax
- Nice beading effect (water repellent) when rinsed
- Pleasant fragrance experience

Application:

Wash and Wax is the ideal product for manual washing of cars and other vehicles. The added wax accelerates the drying process and gives the car a deep gloss and protection.

Directions for use:

For best results, mix 1 part Shampoo to 80 parts water in a bucket. After washing, rinse the car without a pressure washer for the best possible wax effect. If using non pure-water, dry any remaining water with a drying towel.

Tips & Tricks:

- Preferably use a dirt lock in the bucket to prevent scratching when washing.
- By rinsing the car with a low-pressure water jet, the use of a chamois can be kept to a minimum
